

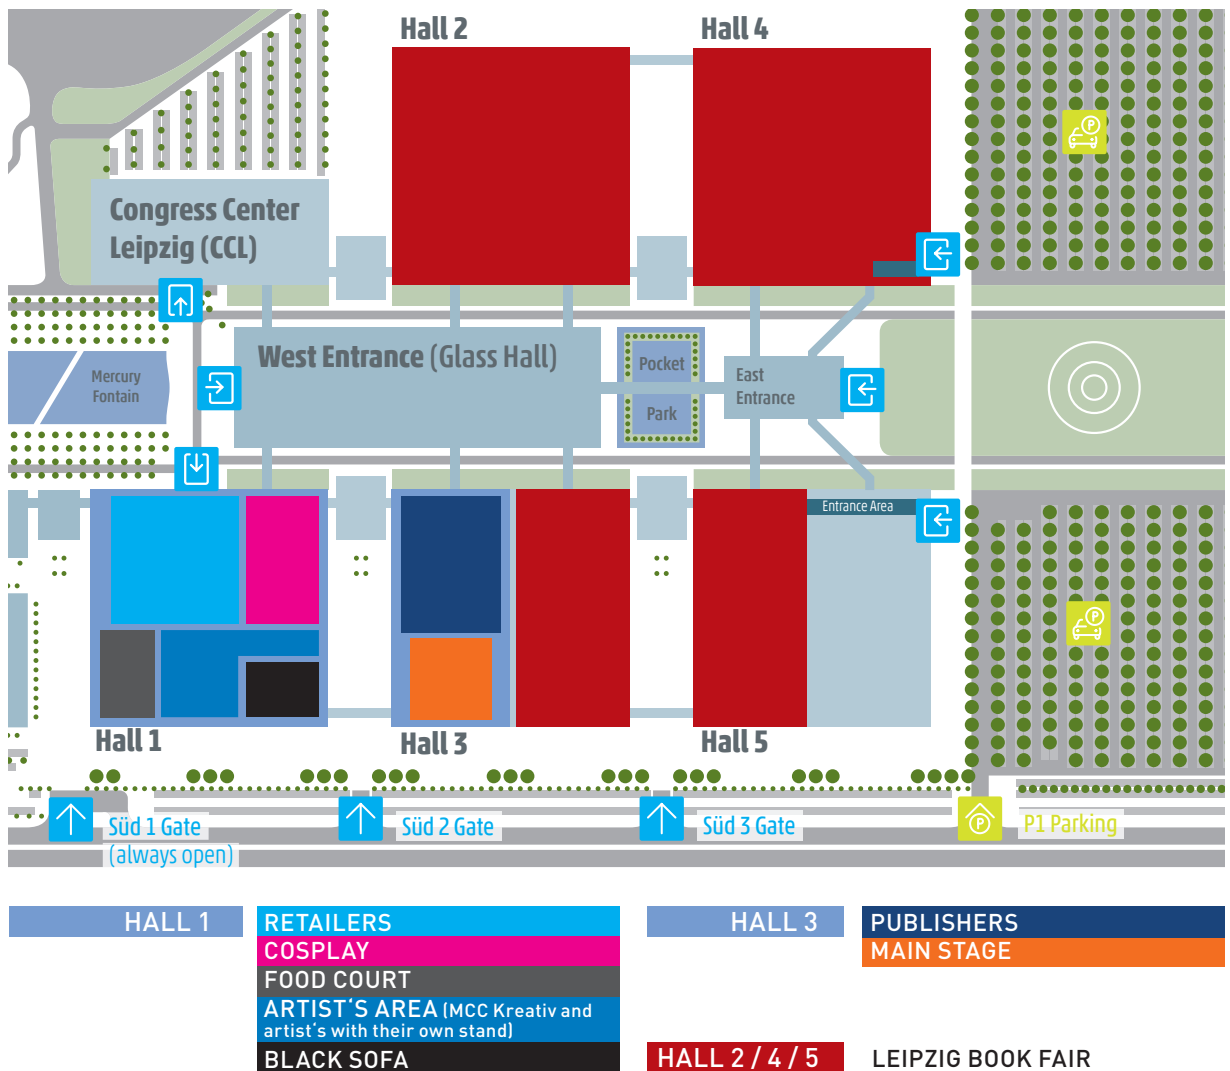

EXHIBITION AREAS AND HALL LAYOUTS

To ensure that visitors can easily find their way around the various themed areas while at the same time bringing together exhibitors with similar products and services, selected exhibitor groups have been relocated. Manga-Comic-Con will be extended into one half of Hall 3. The section for children and teenagers as well as the fantasy area have been moved to Hall 3 so that they are located closer to the neighbouring Manga-Comic-Con. By locating these two subject areas closer together, we can create a comprehensive presentation for our young visitors that covers the entire spectrum of literature and provides a targeted investment in the promotion of reading.

Manga-Comic-Con presents a wide and varied selection on all aspects of manga, anime and comics. **According to the current plans**, it is divided into the following sections:

Subject to change. Updated: July 2022

Stands will be allocated to exhibitors according to the time of registration, the rooms and space available, the exhibitor's needs and the possible options. Depending on the number of registrations, we will plan the hall layout and structure the exhibition areas at our own discretion. We expect to be able to announce the stand numbers in early February.
